ERICA SANTINI | SOFTWARE DEVELOPER - EARLY CAREER

Montreal, QC | Canadian Permanent Resident | Open to relocate across Canada
ericasantini92@hotmail.com | +1 (438) 920-9806 | LinkedIn | Website

SUMMARY

Software developer with hands-on experience building and customizing enterprise manufacturing systems across backend features, frontend workflows, REST integrations, SQL data, testing, and production troubleshooting. Brings practical ERP/MES knowledge and professional experience using OpenAI Codex to support codebase exploration, debugging, testing, and documentation. Demonstrated clear communication, adaptability and critical thinking. Interested in roles where I can keep learning, contribute to useful products, and gradually grow into AI-focused development to solve practical problems.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer

4CAD Group Logiciels Inc. | Montreal, QC, Canada | February 2024 - October 2026

- Core technologies and tools: Java, Spring Boot, Hibernate/JPA, Angular, TypeScript, JavaScript, RxJS, REST APIs, PostgreSQL, SQL, Git, GitLab, Jenkins, JUnit, Gradle, Yarn, CI/CD, JasperReports, IntelliJ IDEA, OpenAI Codex.
- Developed and adapted front-end workflows, forms, and interfaces for enterprise MES users, tailoring screens and interactions to client-specific manufacturing and inventory processes.
- Developed new back-end functionality and adapted existing features to client-specific business logic and operational processes.
- Built data import and export workflows, and developed interfaces integrating Aquiweb with REST APIs and other software.
- Implemented process validations, including a stock check that prevented users from recording material consumption above available inventory.
- Added CSV validation and error handling to imports, with rollback preventing incomplete records on failure.
- Generated client-specific operational reports with JasperReports.
- Tested features and investigated production issues using logs, SQL queries, and user workflows; reproduced problems, validated fixes, and supported releases.
- Collaborated with developers, functional consultants, and clients to clarify requirements, document technical work, and deliver tested features to production.
- Participated in GitLab code reviews and GitLab/Jenkins CI/CD workflows.
- Participated in sprint planning and estimation using Planning Poker.
- Used OpenAI Codex to understand existing codebase, investigate issues, support testing and documentation.

Software Developer Consultant - Sage X3/ERP

4CAD Group Logiciels Inc. | Montreal, QC, Canada | January 2023 - January 2024

- Core technologies and tools: Sage X3, Sage X3 4GL, SQL, Crystal Reports, Microsoft SQL Server, Eclipse.
- Customized and maintained Sage X3 ERP functionality using Sage X3 4GL and SQL, adapting existing behavior to client requirements and workflows.
- Partnered with English- and French-speaking clients to clarify requirements and validate workflow-specific solutions.
- Investigated application and database issues, reproduced defects, tested changes, and supported technical troubleshooting.
- Created and maintained client-specific Crystal Reports for operational reporting, using features such as formulas, parameters, conditional logic, and subreports.

Developer Intern

4CAD Group Logiciels Inc. | Montreal, QC, Canada | October 2022 - December 2022

- Developed a prototype that connected to the Sage X3 REST API, retrieved manufacturing orders, and displayed them in a web interface with a weekly calendar view.

Producer

Imgnation Studios | Brazil | February 2021 - December 2021

- Developed and debugged game functionality using C# and Unity; participated in Agile development, testing, QA, bug tracking, and release delivery.

Project Management Intern

Imgnation Studios | Brazil | August 2020 - January 2021

- Served as acting Scrum Master for a small mobile game development team, supporting sprint planning, task coordination, team communication, and delivery.

TECHNICAL SKILLS

Programming: Java, TypeScript, JavaScript, SQL, Sage X3 4GL, C#.

Frontend: Angular, RxJS, Reactive Forms, Angular Routing, HTML, CSS, SCSS.

Backend and data: Spring Boot, Hibernate/JPA, REST APIs, API integration, PostgreSQL, Microsoft SQL Server, stored procedures, Flyway, Bean Validation, Jackson, data import/export, data validation.

Testing and delivery: Unit, functional, and regression testing; JUnit; debugging; production troubleshooting; code reviews; technical documentation; Git, GitLab, Jenkins, CI/CD, Gradle, Yarn, Agile/Scrum.

Reporting: JasperReports, Crystal Reports.

Development tools and platforms: IntelliJ IDEA, Eclipse, Visual Studio Code, DBeaver, pgAdmin, SQL Server Management Studio, Postman, Chrome DevTools, Unity, Confluence, OpenAI Codex.

Additional project and academic technologies: Node.js (internship prototype); Python, PyPDF2, ReportLab, pytz, and Linux/Ubuntu (academic project); C and C++ (coursework and tutoring); Arduino (coursework and small personal projects).

EDUCATION

Diploma of College Studies (DCS/DEC), Computer Techniques: New Media Programming

Institut Grasset | Montreal, QC, Canada | August 2021 - December 2022

- Graduated at the top of the class with a 94% weighted average.
- Relevant coursework included web development, JavaScript, Node.js, databases, and object-oriented programming.
- Tutored classmates in object-oriented programming with C++.
- Completed hands-on Arduino coursework and built small personal projects.

Bachelor of Business Administration

Universidade Federal de Santa Maria (UFSM) | Brazil | March 2017 - January 2021

- Received a research scholarship for two consecutive semesters.
- Participated in a Junior Enterprise focused on business consulting and strategic planning.
- Completed a student exchange at Université du Québec à Montréal (UQAM).

Computer Science Coursework

Universidade Federal de Santa Maria (UFSM) | Brazil | March 2013 - November 2016

- Completed coursework that included data structures, algorithms, C, C++, object-oriented programming, and databases.
- Tutored C programming.
- Selected by my Logic and Algorithms professor as one of two students to compete in an ICPC programming contest.
- Helped deliver introductory workshops on programming logic for high school students.

PORTFOLIO PROJECTS

Portfolio Website | Github

- Technologies and tools: React, TypeScript, CSS, Vite, React Router, i18next, Visual Studio Code, Git Bash.
- Built a multilingual portfolio with language-based routes, theme switching, and media galleries for projects.

RunnerRPG | Github

- Technologies and tools: C#, Unity, Unity UI, ScriptableObjects.
- Developed gameplay and interface features for a mobile RPG, including turn-based battles, character progression, equipment upgrades, and local save/load functionality; tested the game on an Android phone.

Translation Company Automation — Academic Project | Github

- Technologies and tools: Python, PyPDF2, ReportLab, pytz, Crontab, Shell, Linux.
- Automated page-based pricing calculations, PDF watermark and registry-page generation, file organization, and daily revenue tracking for a fictional translation company.

LANGUAGES

English: Fluent | **French:** Fluent | **Portuguese:** Native.
